

Flora-Zymes™ (Item #1003) Natural, Plant-Derived Digestive Enhancement

Recommended Dosage: Two Capsules with Each Meal

Flora-Zymes are a combination of four plant-derived digestive enzyme complexes with the addition of probiotics. The probiotics found in Flora-Zymes help your body to absorb more nutrients, strengthening your immune system and giving you more vitality.

This superior combination of Enzymes also includes Tracite Fulvic Minerals, a proprietary blend of 77 trace minerals, which stimulates the body enzyme systems. The fulvic acid blend also enhances and transports nutrients, catalyzes enzyme reactions, increases assimilation of nutrients, and stimulates metabolism.

What are Digestive Enzymes?

Enzymes are essential to food digestion because they break down food particles and help the body to absorb nutrients. Fresh fruits and vegetables are abundant in enzymes, however once cooked and processed, they lack the enzymes necessary for healthy digestion. Food that is not completely digested can, over time, contribute to a variety of health concerns such as: food allergies, intestinal and bowel issues, obesity, and acid reflux.

What are the four plant-derived digestive enzymes found in Flora-Zymes?

- ① **Amylase:** aids in the digestion of starches
- ① **Protease:** aids in the digestion of proteins
- ① **Lipase:** aids in the digestion of fats
- ① **Cellulase:** aids in the digestion of fibers

What are Probiotics, Acidophilus, and Bifidus?

- ① **Probiotics:** Friendly bacteria that inhibit the growth of harmful bacteria. Probiotics increase immune system health and promote healthy digestion.
- ① **Acidophilus:** A strain of probiotic bacteria that promote intestinal health and protect against potentially harmful organisms.
- ① **Bifidus:** A strain of probiotic bacteria that plays an important role in immune response. It promotes colon health and pH balance in the colon. Bifidus is found in human breast milk and can help prevent many digestive disorders.

How should Flora-Zymes be taken?

The recommended dosage is two to four Flora-Zymes with each meal. It may also be beneficial to take three or four capsules at bedtime, which is the best time for the bifidus to balance the pH of the colon.
