

Mag/Cal 7:5 (Item # 2008) Formulated to enhance bio-availability

Mag/Cal 7:5 was developed for those individuals who have trouble absorbing dietary calcium or need extra magnesium in their diet. Our Mal/Cal formula contains Amino Acid Chelate, Citrate, Aspartate, Arginate Malate, Succinate, and Lactate. This superior combination of minerals also includes Tracite Fulvic Minerals, a proprietary blend of 77 trace minerals, which stimulates the body enzyme systems. The fulvic acid blend also enhances and transports nutrients, catalyzes enzyme reactions, increases assimilation of nutrients, and stimulates metabolism.

Dosage: Take 2 vegi-capsules with each meal or as directed by a qualified health professional.

Ingredients Explained

Magnesium - Magnesium helps maintain normal muscle and nerve function, keeps heart rhythm steady, supports a healthy immune system, and keeps bones strong. Magnesium also helps regulate blood sugar levels, promotes normal blood pressure, and is involved in energy metabolism and protein synthesis.

Calcium - Calcium is a naturally occurring mineral that is needed by the body to build and maintain strong bones and teeth. Because calcium is not made in the body, it must be absorbed through dietary or supplement intake. Calcium deficient diets cause the body must break down bone to obtain the mineral.

Vitamin D-3 regulates the calcium and phosphorus levels in the blood by promoting their absorption from food in the intestines, and by promoting re-absorption of calcium in the kidneys. It plays an important role in the maintenance of organ systems, bone formation and mineralization, and is essential in the development of an intact and strong skeleton.

Boron enhances the body's ability to use calcium, magnesium, and vitamin D. It also assists in brain functioning and recognition.

Food Enzymes are responsible for every single chemical reaction in every single cell of your body. All your minerals, herbs, vitamins and hormones cannot do their jobs without enzymes.

Tracite is a combination of 77 trace minerals and elements that are necessary for a healthy and vibrant life. Tracite is an iron based, plant derived, trace mineral composition rich in chromium, vanadium and selenium. It is also rich in macro-minerals, trace minerals, trace elements and especially fulvic acid, which chelate and bind minerals into a bio-available form for use by our cells.
